

A suspended wait where memory, desire and emotional fragility intertwine as a relationship slowly unravels.

Dear Programming Team,

We would like to bring to your consideration **Detrás de cada incendio**, an Argentine short film rooted in a contemporary auteur approach to character-driven storytelling and subjective experience.

*The film follows Simón during a wait in a mental health hospital, where fragmented memories of his childhood and of a recent relationship with another man emerge between past and present. Within this emotionally suspended space, his connection with Naomi becomes his only point of grounding.*

With a minimalist and naturalistic sensibility attentive to emotional rhythms and inner states, the film explores fragility, identity and affective bonds through an intimate lens.

The film has already been submitted to your current edition. It has not yet premiered at any festival and is available for **world premiere** consideration.
